

3d - Do while Loop

Thursday, 6 August 2026 05:59

```
do {  
    // statement  
} while (condition);
```

Break Statement:

On break being reached the current loop is immediately.

If break is in a conditional in a loop, it will exit that loop

Continue Statement:

Does not execute rest of the loop.
Starts next iteration of the loop.
